mobile+
for Workday®

What is mobilePLUS for Workday?

mobilePLUS is a mobile-based Business Asset solution for use with Workday® Financial Management. It meets the challenge many teams face when trying to track items and conduct periodic audits for compliance, analysis, reporting, operational planning and more.

mobilePLUS provides you with **an intuitive, automated way to capture inventory count – and current information** about your assets. It then electronically **communicates what you find to Workday**.

mobilePLUS helps you to answer your main asset management question – where is my _____?   And it does so with a single scan.

The best part about mobilePLUS is that **it is easy**. It's easy to implement, easy to use and easy to communicate with your Workday solution.

Why Use mobilePLUS for Workday?

Enables Your Team to do More:
mobilePLUS is a complete solution that, like Workday, was built to go anywhere. The mobilePLUS architecture enables your team to use a **wide variety of mobile devices** to automate the capture of asset data with barcodes, RFID tags &/or intuitive screen entry.

Your users aren't restricted to where there is a network connection either. mobilePLUS was designed to **operate anywhere your assets are stored – regardless of network availability**.

How Would mobilePLUS Work in Your Organization?

mobilePLUS complements your Workday solution by **extending the visibility of your Business Assets**. By enhancing your business processes with our mobile solution, mobilePLUS enables you to **know what you have – and where you have it – whenever you need it**.

From asset arrival throughout their lifecycle in your organization, mobilePLUS provides the eyes Workday needs to **ensure the accuracy of your Business Asset data**.

Contact us for a complementary process review to show you how mobilePLUS may fit into your organization.

USING mobilePLUS
Inventories Made Easy.

GET THE DATA

Download Asset Data from Workday®
Select the Workday Business Assets that you need to inventory or audit and download them into mobilePLUS Host.

PREPARE THE WORK

Divide the Data & Send to the Users
Sort the assets for the different user's tasks & then send the work to mobilePLUS Client.

COMPLETE THE INVENTORY

Log In & Start Scanning
Users log into mobilePLUS Client on their devices, select their inventory tasks & start scanning.

GET RESULTS

Upload the Data
When your Users are done, they send the data back to mobilePLUS Host for review. The data is then sent on to Workday.
